

THEATER MEDICAL INFORMATION PROGRAM (MARITIME)

DESCRIPTION

Theater Medical Information Program (Maritime) — TMIP-M — provides clinical data collection and data transport capability in a combat or hostile environment involving deployed forces. TMIP-M is a component of TMIP, which is a Department of Defense-directed joint program. TMIP-M, which includes both the Navy and Marine Corps, provides medical information processing capabilities to medical staffs in theater as well as medical planners and command-and-control elements at all echelons. TMIP-M provides a full suite for user-configurable support for all aspects of theater health services from patient-encounter data to medical logistics.

OPERATIONAL IMPACT

TMIP-M provides improved casualty tracking and treatment and medical supply management. While the majority of the data entry and manipulation will be done by corpsmen, all medical department personnel will interface with the system in some way.

PROGRAM STATUS

The program will be developed in three “blocks.” Pending successful evaluation during FY04, the Marine Corps will field the Block I product to the health service support and medical logistics communities during FY05.
